

FWC – AI/ML with Fullstack Job Description

POSITION:**NUMBERS:**

Job Title: AI/ML with Fullstack Engineer	40
---	----

REQUIRED TECHNOLOGY STACK:

Frontend: React.js, Next.js, Angular, HTML5, CSS3, JavaScript

Backend: Node.js, Python, Java

Database: MongoDB, MySQL, PostgreSQL

AI/ML: OpenAI, Gemini API, Claude, Hugging Face, TensorFlow.js, Python Libraries (*pre-trained models acceptable*)

Deployment: Vercel, Netlify, Render, Heroku (any free hosting platform)

Version Control & Collaboration: Git, GitHub, GitLab, Bitbucket

Cloud & DevOps: AWS Free Tier, GCP Free Tier, Azure Free Tier, Docker, GitHub Actions

APIs & Integrations: REST, GraphQL, third-party APIs (authentication, notifications, payments)

Authentication & Security: OAuth 2.0, JWT, Firebase Auth, basic encryption and hashing

UI/UX Tools: Figma, Adobe XD, TailwindCSS, Bootstrap, Material UI

Testing: Jest, Mocha, Cypress

Submission & Documentation: README, architecture diagrams, API documentation, GitHub repository, deployment link

QUALIFICATIONS:

Bachelor's or Master's degree in **Engineering in AI/ML or Data Science**

CTC & CAREER OPPORTUNITY:

Starting CTC: ₹ 10 LPA

Selected candidates will be under a 3-month training program worth Rs. 4,00,000/ from the industry leaders and business consultants.

- Post-training, candidates will be deployed to work on live client projects across our Domestic and International locations, primarily in **India, Dubai and Singapore**.
- Commitment Bond: Minimum 3 years (mandatory)
- Annual Salary Growth: 20%–40% hike based on performance and company policies
- ESOP Opportunity: Eligible for Employee Stock Ownership Plan (ESOPs) after completing 1 year of service

JOB PROFILE:**KEY RESPONSIBILITIES:**

- Develop and implement AI/ML solutions to address complex business challenges.
- Research and create Generative AI models for various applications, including natural language processing and computer vision.
- Train and fine-tune large language models for enhanced accuracy in specific domains.
- Collaborate with cross-functional teams to ensure successful project delivery.
- Present AI-driven insights and solutions to stakeholders, demonstrating their impact on business objectives.
- Mentor junior team members and foster a culture of continuous learning.
- Enthusiasm for AI/ML technologies and a willingness to learn.

- Familiarity with programming languages such as Python or R is a plus.
- Strong analytical, problem-solving, and communication skills.
- Strong understanding of project management tools (e.g., Jira, Asana, Trello).
- Proficient in PC skills and application software like MS Word, Excel, PowerPoint, and Visio
- Proficiency in business intelligence tools (Power BI, Tableau) for data reporting and analysis.
- Ability to analyze system technical limitations and their impact on solutions.

DO's:

- Use open-source libraries and tools
- Implement at least 4 AI features
- Ensure mobile responsiveness
- Focus on user experience
- Document your code

DON'Ts:

- Don't copy existing solutions
- Don't use paid APIs without free tiers
- Don't submit incomplete projects
- Don't exceed team size limit

FAQs:

Q: Can we use existing templates? A: Yes, but the core logic and AI features must be original.

Q: Are cloud services allowed? A: Yes, use free tiers of any cloud service.

Q: Can we use ChatGPT/Claude API? A: Yes, any AI API is allowed including LLMs.

Q: Is attendance mandatory for all team members at finals? A: At least one team member must be present.

Q: Can we continue development after submission? A: No, the submitted version will be evaluated.

INTERVIEW & HIRING STRATEGY:**Round 1: Technical Hackathon**

- A coding hackathon will be conducted exclusively for Computer Science and AI/ML students.
- The hackathon duration will be 1–2 weeks from the date of confirmation.
- Students can participate from anywhere – college, hostel, or home.
- Use of AI tools and mentorship from industry leaders is allowed and encouraged.
- Participants may also reach out to the FWC technical team for clarification or guidance.
- Eligibility: All students are welcome to participate, regardless of percentage or academic backlogs.

Hackathon and Project Details:

Theme: Build the Future of HR Management with AI-Powered Solutions

Objective & Project Requirements: Develop a next-generation Human Resource Management System (HRMS) that leverages artificial intelligence to streamline and automate HR operations for modern workplaces.

- Incorporate all core HRMS functionalities (employee data management, attendance, payroll, performance tracking, etc.).
- AI-driven resume screening & evaluation without human intervention.

- AI-powered conversation & voice interaction models for recruitment and candidate screening. Multi-role login system with tailored access for: Management Admin; Senior Manager; HR Recruiter; Employee

Personalized dashboards:

- Each user should see their own activity dashboard.
- Admins should view individual + company-wide dashboards.
- Scalability: Must support 5,000+ employee logins with real-time data processing.
- Design: Clean, intuitive UI/UX, optimized for both web and mobile (responsive) access.

Round 2: Selection Process

- The top 80 participants will attend a face-to-face interview with our tech team.
- From these, shortlisted candidates will be invited to the FWC office for a managerial discussion.
- After the discussions, final winners will be announced and selected candidates will receive an offer to join FWC.

TERMS AND CONDITIONS:

- From the top students, 40 candidates will be selected for a 3-month training program, starting from the date of selection.
- After successful completion of the training, they will transition into a full-time role at FWC.
- If a candidate is found non-performing, FWC reserves the right to terminate from the training period without notice.
- If, during the training, FWC management feels the candidate needs to upgrade skills or obtain certifications, FWC will: Recommend relevant certifications, Reimburse the course expenses upon completion.
