

ABHINAV BHARADWAJ

Bengaluru, Karnataka

+91 8210980755 abhinavbmsce09@gmail.com LinkedIn Github

Professional Summary

Software Engineer with a strong foundation in C and C++, and hands-on experience in full-stack development using React, Node.js, Express.js, and RESTful APIs. Skilled in PostgreSQL, MySQL, and MongoDB. Familiar with machine learning concepts and passionate about building intelligent, data-driven solutions. Known for a security-first approach, scalable architecture design, and a collaborative mindset.

Education

B.M.S COLLEGE OF ENGINEERING, Bangalore

November 2022 - June 2026

B.Tech : Electronics and Communication Engineering

CGPA: 7.87/10.0

Relevant Coursework: Object Oriented Programming , Database Management System , Operating Systems, Computer Networks ,Artificial Intelligence, Full Stack Development

Projects

Web : Expense Tracker Application | React, Node.js, MongoDB, REST API, JWT | **April 2025 – July 2025**

- Implemented **JWT-based user authentication** with secure login, registration, and session management using **Node.js** and **Express.js**.
- Developed a responsive **frontend in React** featuring dynamic dashboards and real-time analytics with **Chart.js**.
- Designed **RESTful APIs** and optimized **MongoDB** schemas to handle user-specific expense tracking and data retrieval.

Web : AI-Powered Interview Prep App | MERN Stack, Gemini API, Tailwind CSS | **June 2025 – Sept 2025**

- Integrated **Gemini API and NLP prompts** to generate personalized interview question sets aligned to user skills.
- Built **data pipelines** to store and analyze user responses for personalized recommendations.
- Implemented **LLM-based content generation** enhancing session engagement and learning curve.Created a **REST backend with JWT** and deployed using **MERN**.

Cold Email Generator using LLMs & LangChain | LangChain, ChromaDB, Groq API, Pandas | **Oct 2025 – Nov 2025**

- Developed an AI-powered tool that automatically generates personalized cold emails for client outreach by analyzing job postings from company career pages and a Streamlit web app for end-to-end user interaction and email generation
- Implemented **web scraping** and **text cleaning** pipelines to extract structured job data.
- Utilized **LLaMA 3.1 (via Groq API)** and **LangChain** to interpret job descriptions and write tailored cold emails.
- Integrated a **vector-based portfolio search (ChromaDB)** to insert relevant project links dynamically.

Technical Skills

Languages:C/C++, JavaScript, SQL, HTML, CSS,Python

Framework: React, Node.js, Flask, Mongoose, Tailwind CSS, Figma

Tools/ Technologies: Git, GitHub, VS Code, Postman,Socket.IO, PyCharm

Databases: SQL, MySQL, MongoDB

AI & Automation Tools: LangChain, Streamlit, Groq API, Pandas, ChromaDB

Soft Skills: Strategic thinking, Business problem-solving, Learning agility, Team collaboration

Certifications and Achievements

- Prior internship experience in frontend development using modern **JavaScript, HTML5, and CSS3 frameworks**.
- Represented **BMSCE** in intercollegiate hackathons, developing innovative, end-to-end web applications under 24-hour sprints.
- Built an **Expense Tracker App** during **BMSCE's Tech Fest** using the **MERN stack** and JWT authentication, enabling dynamic QA generation.
