Education

B.M.S COLLEGE OF ENGINEERING, Bangalore

November 2022 - June 2026

B.Tech : Electronics and Communication Engineering

CGPA: 7.8/10.0

Relevant Coursework: Data Structures and Algorithms, Object Oriented Programming , Database Management System , Wireless Communication Networks , Computer Networks , Web Development , VLSI , Digital Communications

Experience

Velocity | Web Developer Intern

December 2024 – January 2025

- Developed a responsive car trading web application using **HTML5, CSS3, JavaScript, React.js, and Bootstrap** delivering optimized UI/UX across mobile and desktop devices.
- Built dynamic, modular front-end features using **React hooks, functional components, and React Router** for seamless navigation and state management..
- Integrated **Firestore Realtime Database** for real-time data sync, applied **Git** for version control, and performed unit testing with Jest to improve performance and reliability by **30%**.

Projects

Web : Expense Tracker Application | React, Node.js, MongoDB, REST API, JWT |  April 2025 – July 2025

- Implemented **JWT-based user authentication** with secure login, registration, and session management using **Node.js** and **Express.js**.
- Developed a responsive **frontend in React** featuring dynamic dashboards and real-time analytics with **Chart.js**.
- Designed **RESTful APIs** and optimized **MongoDB** schemas to handle user-specific expense tracking and data retrieval

Web : AI-Powered Interview Prep App | MERN Stack, Gemini API, Tailwind CSS |  June 2025 – Present

- Built a **full-stack interview preparation platform** using the **MERN stack**, integrating **Gemini API** to generate personalized QA based on user role and experience.
- Developed **JWT-secured authentication**, dynamic role-based question sessions, and **AI-driven concept** explanations, improving user engagement and personalization.
- Designed a responsive, accessible UI using **React.js** and **Tailwind CSS**, with features like accordion-based **QA**, question pinning, and MongoDB-backed session storage.

Embedded: Vision-Controlled Voice Bot | ESP32, C/C++, MicroPython, OpenCV, HTML, CSS |  Feb 2025 – March 2025

- Developed a **voice-activated robotic arm** using **ESP32** and a voice recognition module, enabling **hands-free** object grasping through real-time servo control.
- Integrated a **camera module** with **OpenCV** to capture and stream object visuals on a custom **Flask-based web dashboard**, enabling remote monitoring and control.
- Programmed efficient embedded logic using **MicroPython**, achieving accurate motor actions with minimal latency and improving task response precision by **40%**.

Technical Skills

Languages: C/C++, JavaScript, SQL, HTML, CSS

Framework: React, Node.js, Flask, Mongoose, Bootstrap, Tailwind CSS, Figma

Tools/ Technologies: Git, GitHub, VS Code, Postman

Databases: MySQL, MongoDB,

Soft Skills: Problem-solving, Collaboration, Adaptability

Certifications and Achievements

- Solved 100+ coding problems on platforms like **LeetCode**, and **CodeTantra**, consistently ranking.
- Represented **BMSCE** in intercollegiate hackathons, developing innovative, end-to-end web applications under 24-hour sprints.
- Built an **AI-powered Interview Prep App** during **BMSCE's Tech Fest** using the **MERN stack** and Gemini API, enabling dynamic QA generation.
