

ABHINAV BHARADWAJ

Bengaluru, Karnataka

+91 8210980755 abhinavbmsce09@gmail.com LinkedIn Github

Education

B.M.S. College of Engineering, Bangalore

November 2022 – Present

Bachelor of Engineering in Electronics and Communication Engineering (CGPA - 8.0)

Bangalore, Karnataka

Relevant Coursework: Object Oriented Programming , Database Management System , Operating Systems, Computer Networks , Artificial Intelligence, Full Stack Development

Work Experience

Sask Promo

Dec 2024 – Feb 2025

SDE Intern

Bangalore, Karnataka

- Built scalable backend services using **Node.js** and **Express.js**, handling concurrent users with optimized API response times.
- Designed **JWT-based authentication** with access/refresh token rotation, improving session security and reducing unauthorized access risks.
- Improved API reliability by identifying and resolving authentication and session-related failures through structured debugging.

Projects

Web : AI-Powered Interview Prep App

April 2025 – June 2025

MERN Stack, Gemini API, Tailwind CSS

- Designed and deployed a scalable **MERN-based application** integrating **LLM APIs** to generate personalized interview questions, reducing manual preparation effort significantly (40–50% based on usage testing)
- Optimized API response latency using efficient request handling and caching strategies, improving response time by 30%
- Integrated frontend with backend APIs ensuring seamless client-server interaction and stateless design.

Cold Email Generator using LLMs & LangChain

Aug 2025 – Sept 2025

Python, Streamlit, LangChain, ChromaDB, Groq API, Pandas

- Built an end-to-end **LLM-powered pipeline** using **LangChain** and **ChromaDB** for semantic job matching and personalized email generation.
- Developed data pipelines for data extraction, transformation, and storage from job listings
- Implemented **vector search** & retrieval-augmented generation (RAG) to improve contextual relevance.

Web : Expense Tracker Application

Oct 2025 – Nov 2025

React, Node.js, MongoDB, REST API, JWT

- Designed **RESTful APIs with JWT authentication** and optimized **MongoDB schemas** to handle concurrent user transactions efficiently, considering horizontal scalability and stateless architecture.
- Deployed full-stack application with CI/CD pipelines, ensuring scalability and stateless architecture
- Improved performance using indexing and query optimization, reducing API latency under concurrent usage

Technical Skills

- Languages:** C/C++, JavaScript, SQL, HTML, CSS
- Frameworks & Libraries:** React, Node.js, Flask, Mongoose, Bootstrap, Tailwind CSS
- Developer Tools:** Cloud & DevOps: AWS (EC2, S3, deployment architecture), Vercel, Render, GitHub Actions (CI/CD – (build & deployment pipelines))
- Databases:** MySQL, MongoDB
- Backend & System Design:** REST API Design & Stateless Architecture, JWT-based Authentication & Session Management, Database Indexing & Query Optimization
- AI & Automation Tools:** LangChain, Streamlit, Groq API, Pandas, ChromaDB

Achievements/Certifications

- Solved **150+** LeetCode problems, focusing on **data structures, algorithms**, and system design fundamentals.
- Led the team to top 13 teams nationally in Mahindra Techathon 2.0 out of 190+ competing teams.
